DETERMINATION OF SOME CHARACTERISTICS OF COPPER LASER RADIATION

Savintsev A.P., Dyshekov A.A., Kyarov A.Kh.

Kabardino-Balkarian State University

Some amplification properties of the copper vapor laser active element GL-202 were studied. The radiation amplification coefficient in the experiments conducted with optimal heating of the active element reached a value of 204 ± 14 units.

Keywords: active medium, copper vapor active element, gain, optimal heating
